ChunYen Wu

Toronto, ON | chunyenwu87@gmail.com | github.com/Chun-Yen087

SKILLS

Data & SQL: SQL (JOINs, aggregations, subqueries, window functions, query optimization), SOQL, MySQL, PostgreSQL, Microsoft SQL Server, Azure SQL, ETL, data cleaning, transformation, validation & reconciliation
Analytics & BI: Power BI (DAX, Power Query), Tableau, Alteryx, Excel (Power Query, Pivot Tables, Macros), Microsoft Access, KPI development, dashboards, trend analysis, forecasting
Programming: Python (Pandas, NumPy), Java, Bash, PowerShell, Git/GitHub, Docker
Enterprise & Tools: Salesforce (Workbench), SAP ERP, Oracle CC&B, SharePoint, Lucidchart (ER, data warehouse, process/flow, UML), Jira, ClickUp, Agile/SDLC, LLM workflow automation (Claude, ChatGPT, Microsoft Copilot)

EXPERIENCE

Scotiabank — Wealth Analytics Intern, Canadian Wealth Management Analytics Sept 2026 – Dec 2026

- Maintain and refresh the Total Wealth Analyzer (TWA) Power BI dashboard on weekly and monthly cycles, tracking KYC, referrals and suggested financial planning for leadership, regional directors, branch managers and advisors across ScotiaMcLeod, Private Banking, Scotiatrust and SJF.
- Extract Salesforce data through Workbench (SOQL) and transform it with Alteryx workflows, Python (Pandas) and SQL to feed TWA datasets for each business line.
- Built an intake tracker dashboard in Power BI, with Alteryx and Power Query, to monitor monthly request volume in the TWA support inbox.
- Serve as user support for TWA across Canadian Wealth Management, resolving questions on missing data, financial plans not yet updated and dashboard functionality.
- Run recurring SQL and SOQL sanity checks to validate data across business lines, and update visuals for ad-hoc leadership requests.
- Delivered ad-hoc analysis identifying legal-entity prospects by advisor to support client acquisition in ScotiaMcLeod.

Toronto Hydro — Senior Technical Student, Operations & Data Analytics Sept 2024 – Aug 2025

- Designed and deployed Tableau dashboards consolidating data from SharePoint, SAP ERP and Excel exports to improve visibility into operational and financial KPIs for cross-functional stakeholders.
- Cleaned, transformed and validated 40,000+ operational records from the enterprise data warehouse by enforcing data integrity checks and reporting standards.
- Built ETL-style automation for recurring contractor KPI scorecards using Excel Power Query, Macros and Microsoft Access, cutting manual reporting effort and standardizing weekly reporting cycles.
- Partnered with engineering, finance and operations teams to define requirements and track 1,000+ work orders in ClickUp, mapping processes in Lucidchart to communicate KPIs to non-technical audiences.

PROJECTS

Financial Market Intelligence Dashboard github.com/Chun-Yen087

ELT pipeline · SQL Server · Python Pandas · matplotlib · OpenAI API · pytest

- Built an end-to-end ELT analytics pipeline on 2.9M+ daily S&P 500 price records (503 companies, 11 sectors); engineered KPIs (daily return, rolling volatility, volume change %, moving average crossover, abnormal volume alerts) validated for consistency between Python and SQL.
- Modeled SQL Server schemas with Lucidchart ER diagrams and delivered a 4-page matplotlib PDF dashboard (Executive Overview, Stock Deep Dive, Sector Analysis, Today's Snapshot).
- Integrated an LLM workflow that turns structured KPIs into executive Markdown summaries for non-technical readers.

Service Booking & Consulting Platform (Team Project) github.com/Vlad-Cojocaru

Java · Spring Boot · JPA · PostgreSQL · Docker · JavaScript · UML

- Engineered the backend user domain in Java with a 3-role hierarchy (Client/Consultant/Admin), Observer-pattern notifications and a singleton PolicyManager; deployed via a 3-container Docker stack (PostgreSQL + Spring Boot + nginx).
- Built a 6-module vanilla JS single-page app with session management and role-based routing for booking, payments, scheduling and admin.
- Translated requirements into UML use case, class and sequence diagrams and coordinated deliverables via Git/GitHub in an Agile workflow.

EDUCATION

York University — BA, Computer Science (Co-op) Sept 2022 – Expected Aug 2027

Seneca College — Diploma, Electronics Engineering Sept 2019 – Dec 2021
